</frameset>
</frameset>
</html>
```

OUTPUT

The screenshot shows a web browser window with multiple tabs. The active tab is titled 'main' and displays a framed HTML document. The document has a black background and contains the following content:

FLOWERS

A flower, sometimes known as a bloom or blossom, is the reproductive structure found in flowering plants (plants of the division Magnoliophyta, also called angiosperms). The biological function of a flower is to facilitate reproduction, usually by providing a mechanism for the union of sperm with eggs.

TYPE OF FLOWERS

Flowers come in thousands of different shapes and color combinations, each with their own name and classification. There are over 400,000 types of flowering plants, so there is sure to be a flower that speaks to your unique personality! If that seems like a lot to sort through have no fear

Types of common flowers

- Crocus
- Daffodil

[More](#)

Types

- Aster
- Azalea
- Black-eyed Susan
- Buttercup
- California Poppy
- Chives

The browser's taskbar at the bottom shows the Windows logo, a search bar, and several application icons. The system clock indicates the time is 23:36 on 06-03-2021.
